

Why Switch to HYBRITECH

Full Traceability and
Peace of Mind:

Certified by the independent
German testing institute **EPH**

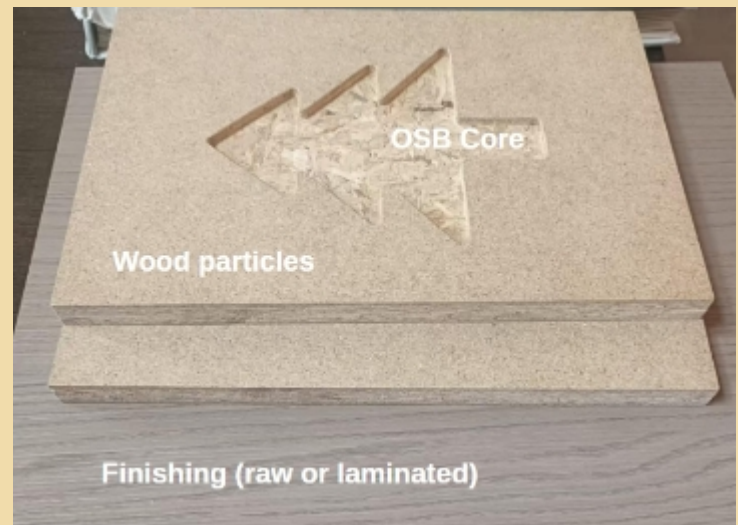

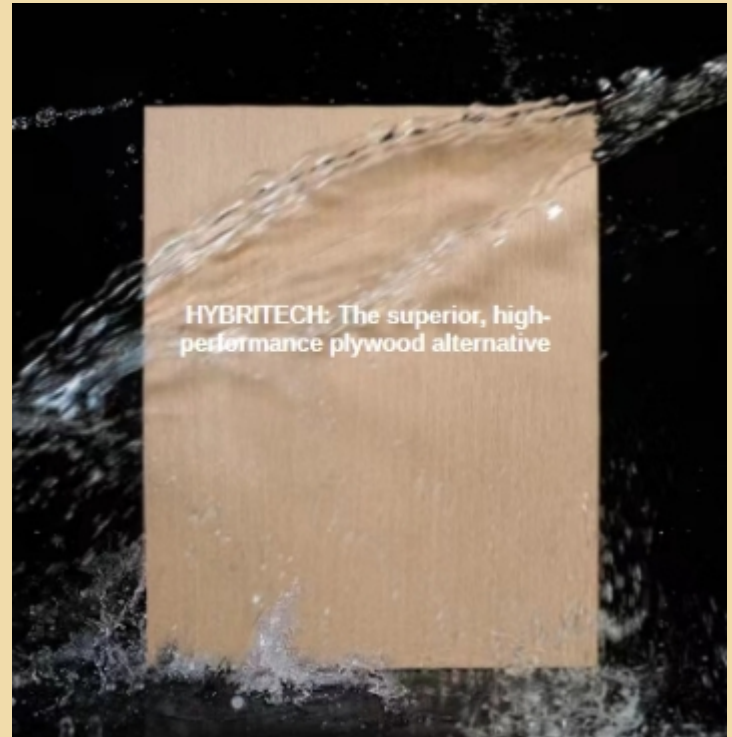

Dresden and backed by
Takarawood's European
representation, ensuring full
compliance with market standards.

**100% Healthy and
Formaldehyde-Free:**

Manufactured with MDI resin to
meet the ENF standard,
complying with Germany's
strictest indoor air quality
regulations.

**30–40% More Cost-
Effective:**

Significant cost savings
compared to plywood with zero
compromise on quality.

**Eco-Friendly and
Certified:**

Sourced from sustainably
managed forests, meeting the
EN 312:2010 (Type P4) standard
for load-bearing applications.

HYBRITECH: Plywood Performance for Up to 40% Less

Exceptionally Stable and Durable: The cross-laminated OSB core withstands high loads and vibrations, resists delamination, and **provides superior screw-holding power.**

High Moisture Resistance: Insoluble MDI resin tolerates moisture and frequent cleaning.

Increased Productivity and Ready-to-Use: Available with a Tongue & Groove (T&G) profile for seamless joining. Features lower cutting waste, no need for pre-sanding, and significantly reduced installation time.

Unique Melamine Finish: Pre-finished decors (LuliGroup) enable direct furniture manufacturing without additional lamination.

Distinctive Design: A modern, subtle fine-grain texture brings a warm, elegant look to interior design.
